## Professional Experience

---

### Full Stack Developer

October 2021 - January 2026

#### Odds Scanner (Remote)

- Built various complex websites and internal tools in the iGaming industry using Next.js, PHP, MySQL, JavaScript, and WordPress CMS
- Successfully launched 15+ websites, from new sites to complete redesigns
- Developer and maintainer of megachute.com, a high-traffic website where users voted on football games and competed for cash prizes, handling over 250,000 users and distributing over 1M BRL in prizes throughout the year
- Co-Developed the revamp of sambafoot.com, a 50,000+ page, multilingual news site (5 languages), collaborating with design, content, and SEO teams
- Collaborated with a team of developers on the redesign and rebuild of oddsscanner.com, a multi-sport platform featuring 9 different sports pages listing games, with 4 sports including real-time live score and odds information
- Discovered a major security flaw during personal research over a few weekends, reported it, and later took ownership of improving and fixing security issues across multiple company websites
- Integrated APIs for payments, CRM, email and phone validation
- Implemented secure authentication systems, supporting both traditional email/password login and social authentication via Google, Facebook, and Twitter
- Built a system that automatically shared new website posts to Facebook and Twitter, ensuring instant updates on social media
- Worked with in-house AdTech solutions to optimize lead generation and improve advertising performance

**Key Technologies:** Next.js, PHP, MySQL, JavaScript, WordPress, API Integration, Security, E-goi, Webpushr, GetResponse, Twilio, Pagsmile, Astropay, ClickUp, Intercom, Cloudflare, Rukovoditel, Docker, DDEV, AdTech

## Freelance Projects

---

- Developed a web-based warehouse stock management system to streamline inventory tracking and optimize stock control processes
- Developed a price tracking system for a UK wholesaler, enabling daily monitoring of fruit and vegetable market prices to support data-driven purchasing decisions
- Developed a comprehensive Excel spreadsheet, enabling personal trainers to efficiently create and customize training plans for their clients

## Education

---

- 42 Lisboa - Software Development (Partial coursework completed)
- Nand2Tetris - Building a general-purpose computer from scratch (Ongoing)
- CS50 (Harvard) - Introduction to Computer Science
- Udemy Courses - Various courses in the JavaScript ecosystem
- FreeCodeCamp - JavaScript Algorithms and Data Structures
- High School Diploma in Economics
